## TOHRI Foundation

TOHRI Foundation is a philanthropic, not for profit initiative with 80G facility. The Foundation is aiming to work on the social, economic and environmental domains of sustainability. Sustainability as a concept is often like an abstract emotion of care, affection that gives comfort to the people of the society. The emotion can be felt but cannot be seen. TOHRI attempts to break this gap by launching a set of activities, action which transforms this intangibility of sustainability to a tangibility of action. It aims to do it through actions which will focus on different issues pertaining to the social, economic and environmental domains of sustainability. The issues will be addressed through a set of services that TOHRI will offer for its clients which in return will contribute to addressing the economic, social and environmental pillars of sustainability.

**Vision of TOHRI Foundation:** To reduce and bridge the gaps in the attainment of various SDGs within the different sections of a developing society in order to mainstream the attainment of sustainable development goals by the marginalized sections of the society by 2030
